Rice Transplanter

Specification

Model		2ZW-6D2		
Type		Ride-on type		
Drive type		Four-wheel drive		
Dimensions	Overall length (mm) (transportation/operation)		3090 / 3050	
	Overall width (mm) (transportation/operation)		2220 / 2280	
	Overall height (mm) (transportation/operation)		2580 / 2580	
Weight (kg)		820		
Engine	Model		Yanmar Brand: 3TNM72	
	Type		Vertical, water-cooled, three-cylinder diesel engine	
	Total displacement (L)		0.904	
	Rated power (kw/RPM)		18.5 / 3600	
	Applicable fuel		High-quality diesel fuel	
	Fuel tank capacity (L)		34	
Starting system		Self start		
Fuel consumption (kg/ha)		2.2-5.6		
Traveling	Wheel	Front wheel type	Explosion-proof tire	
		Rear wheel type	Rubber lug wheel	
		Front wheel diameter x width	φ650 x 95	
		Rear wheel diameter x width	φ950 x 50	
		Wheel-track (mm)	1200	
	Steering type		Overall hydraulic steering	
	Gearshift method		HST

Rice Transplanter

	Number of shifting positions	Main shifting: forward & backward 5 stage (sub-transmission: 2 stages; Anti-sinking: 2 stages)
Planting portion	Number of planting rows	6
	Row distance (mm)	300
	Hill space (mm)	100, 120, 140, 160, 180, 210, 240
	Planting depth (mm)	10 - 55 [7 stages]
	Number of seedlings per hill	Cross Feed Distance(mm/times) 11/26, 14/20, 16/18, 20/14
	Balancing type	Vertical taking depth(mm) 8 - 18mm Automatic leveling control
Planting speed (m/h)		0 - 1.65
Min. ground clearance (mm)		500
Planting Density / No. of hills per 3.3m ²		45-108
Seeding condition	Seedling type	Seedling mat
	Seedling height (mm)	80 - 250
	Number of leaves	2.0 - 4.5
Warning device		battery charging, oil pressure, backward, water temperature, lack of seedling
Operation efficiency (ha/h)		0.2 - 0.7
