COMPANY OVERVIEW

Aliz International, incorporated since 1996, is a leading solar company specializing in providing reliable and sustainable energy solutions in the Agriculture sector. Aliz International also benefits from a strong background in agriculture machinery, seed, and solar modules. With a head office in Lahore and branch offices in Layyah and Burrewala, we serve customers across various locations.

NOTABLE ACHIEVEMENTS:

Aliz International has established itself as a reputable vendor, having worked closely with renowned institutions. We have been the main vendor of the Punjab Irrigation Department since 2014, successfully completing 400 solar projects related to farm water management. Our projects include notable initiatives such as the Punjab Irrigated-Agriculture Productivity Improvement Project (PIPIP), the Koh-E-Suleman Improvement Project (KSIP), and the Punjab Resilient Irrigated Agriculture Transformation (PRIAT). These projects have enabled us to implement sustainable solutions that enhance agricultural productivity and water management.

Additionally, we have completed 200 projects as a vendor of U-Micro Finance Bank's solar financing program since July 2022. These projects have primarily benefited farmers, empowering them with affordable and clean energy solutions. We take pride in our commitment to serving the agricultural sector and have developed tailored solutions that meet the unique energy requirements of farmers.

TARGET MARKETS

Our focus is on serving residential customers and farmers, addressing their specific energy needs. For residential customers, we understand the importance of reliable and cost-effective solutions. Our expertise in residential solar installations ensures that our clients receive top-quality systems, reducing their carbon footprint and providing them with energy independence. For the agricultural sector, we offer specialized solutions that optimize energy usage and enhance farm operations, enabling farmers to increase productivity sustainably.

TEAM:

At Aliz International, we have a dedicated and skilled team to deliver quality services. Our team comprises experienced electrical engineers, an agriculture engineer, marketing professionals, and an international business expert. With a strong and diverse team, we bring together expertise from various domains to provide comprehensive solar energy solutions.

IN-HOUSE PRODUCTION OF SOLAR TRACKERS AND STRUCTURES

As part of our commitment to delivering customized and efficient solar solutions, Aliz International has established an in-house production facility for solar trackers and structures.

By manufacturing our own trackers and stands, we ensure quality control, cost-effectiveness, and the ability to meet the specific installation requirements of each project.

PROJECT FINANCING

The capital required to fund renewable energy projects can be a great challenge. We have access to financiers that could help bankroll your renewable energy project. With a flexible repayment plan, your organization can immediately derive the benefit of renewable energy in spite of financial constraints.

DETAILED ENGINEERING & DESIGN

From small scale projects to Solar Power plants, we undertake engineering design, grid interconnectivity, intelligent switching systems and other cutting edge features required in electrical substations.

MISSION STATEMENT

"To empower communities through reliable and sustainable solar energy solutions, ensuring a brighter and greener future."

VISION STATEMENT

"To be the trusted leader in the solar industry, driving positive change through innovative solutions, exceptional service, and lasting partnerships."

RESIDENTIAL SOLAR INSTALLATIONS

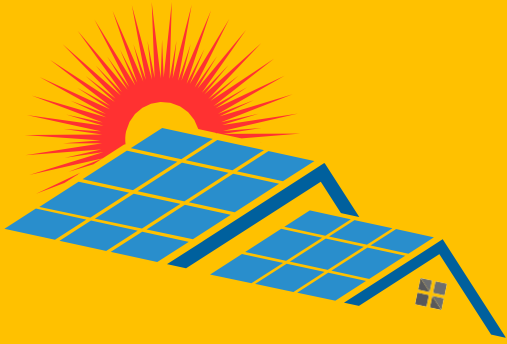

Aliz International has been at the forefront of installing On-grid & Off Grid solar systems for residential customers across Lahore. Our commitment to quality, reliability, and customer satisfaction sets us apart. By leveraging our expertise, we ensure that our residential clients receive customized solar solutions that meet their energy requirements effectively. Through our installations, we enable homeowners to embrace renewable energy, reduce electricity costs, and contribute to a greener environment.

PRE- QUALIFICATION

We are proud to be pre-qualified as a solar vendor with Pakistan Micro Finance Investment Company (PMIC). This recognition underscores our dedication to delivering high-quality solar solutions and our adherence to industry standards and best practices.
